**SILAK** (pronounced SEE-LACK) Inuit for (wide untamed spaces) is based in Kuujuaq Quebec, the most northern region of the province call Nunavik. This arctic region of Quebec is home to the Leaf River Herd of the Quebec Labrador species. This Magnificent migratory mammal called (rangifer tarandus ) or Tuktu by the Inuit , is estimated at over 750,000 animals.

Over the years, most of the Trophy animals were taken from that world renowned herd, and in that area. All our camps are located in the Ungava Bay Area, near or above the tree line. With Global warming, Caribou food sources are best found in this area. Located some 450 miles further north than Shefferville, this is definitely the best hunting area of all North America for a first class Caribou hunt. Silak adventures operates the needed number of camps to meet up with hunters expectations and backs its advertised success rate with an amazing guarantee.
